PROFILE INFO

I'm a full-stack developer with more than 5 years of experience that is capable of creating both client-side and server-side software. I also have modern computer knowledge in areas like html, css, javascript, mongodb, express, react, node, jquery, php, c#, sql server, my sql, sql plus, sql lite, and others.

I am an enthusiastic, energetic and adaptable young man with clear and concise vision and proven willingness to upgrade my skills and knowledge by continuous learning. Currently I am looking for jobs in computer science related fields in order to gain some more practical experience.

OBJECTIVE

To seek challenging assignments and responsibility and to deliver the best solutions for it, with an opportunity for growth and career advancement.
